Hello Joe:

If you could start on May 11 thru the May 20 this would be the best days for us to work on the project. We have a group that will be sight seeing and we need to take them around for CSI. I promised Tom that I would do this first trip to help raises the money needed for the digging and restoration. I will have Tom send a letter to commit to you ASAP. The dates for Montana sound great will try to make the dig.
